

## Policy & Compliance Analysis Service

Security On-Demand's™ Policy & Compliance Analysis Service provides security policy configuration risk analysis as a managed service. It is a comprehensive, scalable, non-intrusive, easy-to-deploy and use, and supports the major firewall platforms in the enterprise market.

### Service Features

Not all organizations have the same IT security and risk management objectives, however all organizations must strike a balance between using their technology investments to satisfy compliance requirements and regulators and ensuring that the organization, data, and business systems are protected and secure. Our service features the following capabilities:

- Identifies security risks present in the firewall configuration & policies.
- Analyze planned firewall rules as part of your risk management process.
- Prevents improperly designed firewall rules from being implemented.
- Maintain regulatory compliance with PCI, HIPAA, SOX, GLBA, NERC.
- Dramatically reduce audit preparation time with instant compliance reports for industry regulations and corporate mandates.
- Real-time firewall change management tracking/notification.
- Compare the firewall configuration to knowledgebase of Best Practices.
- Identify unused rules according to actual traffic/logs, rules that will never be used, disabled rules, unused objects, expired rules, etc.

### Firewall Operations Benefits

- Save labor – avoiding unneeded changes.
- Save time on troubleshooting.
- Real-time change alerting.

### Cloud-Based Service

- No hardware or software purchase required.
- Fully hosted and managed using Security On-Demand's hardware, bandwidth and resources.
- Pay as you grow – purchase only the capacity you need.

### Accuracy Matters

- Our non-intrusive, offline analysis can be performed on a single firewall, group of firewalls, or on a Cisco IOS based router. Our solution uses patented 5-dimensional algorithms to calculate how the firewall will respond to every potential packet it may encounter.
