Welcome to the Partner Success Program

Dear Partner,

At Security On-Demand, we understand that your clients are the most important thing that you have. Your customers rely on your expertise to recommend and deliver security solutions designed for their unique needs and business requirements. We also understand that the partners you go to market with is a critical component to delivering competitive differentiation and profitable outcomes.

Our 2020 Partner Success Program is designed to help you deliver help you deliver successful and profitable services using SOD's award-winning ThreatWatch MDR platform and related services. We look forward to helping you craft a market-leading set of managed security services designed to fit your product solution offering, whether you are providing a private-label offer, a-la-carte custom solutions, or resell the services as currently formulated.

Thank you for considering Security On-Demand as part of your partner ecosystem. I believe that successful partnerships begin with solving your business and solution needs while establishing a foundation for mutual profitability, trust, and creativity in solving customer problems. Our partner go-to-market philosophy is based on deep commitment and on-going investment into the partner relationship with solution training, product design, and market development support. We believe it's critical to make these investments to help you accelerate growth, remain cutting-edge, and deliver on client expectations.

As a 100% channel focused company, we recognize the value that you bring to our partner ecosystem and we are committed to building a long-term, successful and profitable relationship together. Thank you for exploring the Security On-Demand Partner Success Program. We look forward to learning more about your needs and how we can be successful together!

Sincerely,

Peter Bybee, CEO

Why Partner With Us?

100% Channel. As a fully dedicated, channel-focused company, we are committed to building a long-term and profitable relationship together.

Solution Differentiation. By partnering with Security On-Demand you'll be a provider of our award-winning and industry leading ThreatWatch MDR offering, that will help win new deals while exceeding client expectations.

Partner Investment. Our partner go-to-market approach is based on deep commitment and on-going investment into the partner relationship. Everything from helping you sell, to training your team and assisting with contracts is part of the relationship.

Profitability. SOD owns the complete technology stack, so you don't pay for vendor SEIM licenses, hardware, integration costs, or other fees. This translates into pure margin and profit for the partner.

Non-Competitive. Ever wonder if who you're partnering with will some day be your competitor? As a partner-focused firm, we do not compete against you to proactively sell our own services.

Partner Resources. When you become a partner, you gain access to our best people and resources including our Partner Portal, training sessions, demo portals, case studies, and training for your team with our SOD Partner Team dedicated to support your success.

A PARTNERSHIP BUILT ON CLIENT VALUE & SYNERGY

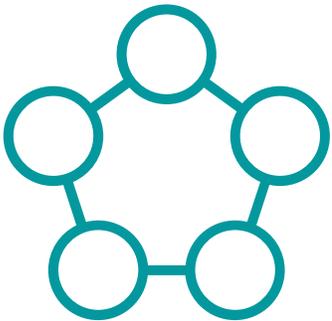

- Add value to each product, consulting, or services sale
- Launch into Managed Security with minimal business risk
- Lock in ownership of your client relationships long term
- Improve your "Trusted Advisor" standing with each client
- Start small & grow with us opportunistically or strategically

Looking for a "Few Good Partners"

We're not looking to sign up anyone and everyone as a partner. We carefully vet each partnership to ensure mutual commitment and expectations on how we add value to your solutions portfolio.

Once we get a chance to get acquainted, we do a deep-dive to find the partner program that best aligns with your business model.

We offer a range of partner models designed to fit your client base and solution offerings, ranging from referral relationships, strategic consulting partnerships, System Integrator, and Private Label programs.

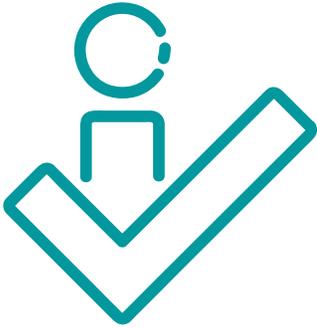

1. Managed Services, Telcos & Cloud Providers - (MSPs, MSSPs, Telco/Carriers, Private Cloud Providers) are under tremendous pressure to innovate quickly and build out scalable and robust security solutions for their clients.

Partnering with Security On-Demand provides you with a fully-mature, market-ready security platform that reduces the time to market, while minimizing the capital investment, staffing labor, training & operations.

MARKET-READY SOLUTIONS DESIGNED TO DELIGHT YOUR CUSTOMERS

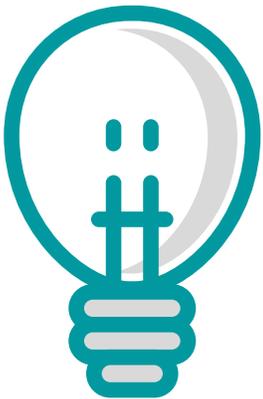

- ThreatWatch MDR & Log Management with 24x7 Threat Monitoring
- Proactive Threat Hunting Service
- Managed Firewall
- Managed IDS/IPS
- Managed NAC
- Managed Web Application Firewall
- Vulnerability Scanning
- Policy & Compliance Analysis

2. System Integrator & IT Solution Providers - No need to create a private label or productized offer if that does not fit your business model.

Our solution offerings can be adopted wholesale without any modification needed.

Partners can either resell, recommend, or build custom offerings around our services that best fit their needs. SOD can help you with your market or solution positioning.

3. Risk & Consulting Organizations - We offer partnership programs for organizations that provide risk management, advisory and IT consulting services.

If your organization has an IT security, risk consulting, or cyber advisory practice, partnering with SOD is a great way to get started with providing a comprehensive risk management solution offer.

From pre-consulting engagements to post implementation consulting services, we provide assistance with developing your organizations consulting services that are designed to enhance each sale of SOD Threat Management solutions.

SERVICE OFFERING CUSTOMIZATION:

- We fully support hybrid public cloud and on-premises based client infrastructure
- Each deployment can be configured as a "multi-tenant" or a dedicated client solution
- Alerts can be forwarded to your own NOC or SOC for further action or client notification
- Reseller multi-tenant Dashboard Portal allows you to view each client individually or all clients collectively
- All client relationship management is centralized through your account managers
- Option to Co-Brand or Private Label Solution Offerings

Partner Support & Enablement

How is your existing MSSP partnership working?

- Does your sales team get the training they need?
- Do you have resources for how to find and qualify prospects?
- Do you and your current partners work together to find new clients?
- Most importantly, are you making money?

Whether you are new to selling managed security or not, we will help teach and train you or your team to help build a profitable MSSP offering.

The key advantage to SOD's Partner Success Program is our teaming efforts. Every partner is trained in our methodology and typically closes more business with us than other solution providers.

- Training - Continual training such as product updates, competitive differentiators, & deep solution knowledge will prepare your team to compete and win business together
- Prospect Teaming - If needed, we partner with you to help prospect, find and position the services to your clients & prospects

COMPARE OUR PROGRAM WITH YOUR EXISTING PARTNERSHIP:

- Unique Co-Selling model - partners close 34% of all deals using our model vs 9% with other MSSP partners
- Unlimited Sales Support - we provide you with all the sales & design resources you need to win each deal
- Device-Based Pricing Model - that's flexible to enough to meet any budget

Partner Levels & Benefits

At Security On-Demand, we understand that your clients are the most important thing that you have, that's why each program is tailored to your needs.

Private Label Option

For select partners, we offer the ability to Private Label the SOD services.

Please inquire further if this capability is needed.

SILVER

- Ideal for VARs, IT resellers & Solution Providers (either security or general)
- Sales training & support provided
- Partner performs needs analysis
- Minimal Risk - All liability borne by Security On-Demand
- Full Advance Compensation on every closed deal
- Client portal branding with reseller co-branding

GOLD

- OEM / Private Label Partner capability
- Ideal for Managed Service Providers, hosting providers & large resellers who wish to brand
- Client Portal Security Dashboard
- Shared Liability or Minimized risk Model - Partner may transfer liability to Security On-Demand via contract
- Recurring revenue stream for partner.

Partner Snapshot: DeserveIT

BACKGROUND

DeserveIT, part of Rad-Bynet group, services over 3,000 customers around the globe and is a prominent player in Israel's cloud-computing market, having garnered a reputation for robust delivery of innovative, always-on infrastructure solutions to leading enterprises. As part of its portfolio of global services, DeserveIT has committed itself to an uncompromising approach to cybersecurity, and pledged to deliver the highest in international protection standards.

Location: Tel Aviv, Israel
Size: Mid-market
Industry: Consulting
Specialty: IT, risk management consulting

THE HACK

In October of 2019, one of DeserveIT's customers noticed strange pop-ups on a popular news site in Israel. In order to analyze the problem quickly and efficiently, DeserveIT reached out to Security On-Demand about the issue. **Within hours, SOD returned with the analysis that pinpointed exactly when and where the cyber attack occurred.** Meanwhile, the news site in Israel with their own in-house IT security team was notified at the same time as SOD, but returned with their analysis 17 days later.

THE FINAL SCORE

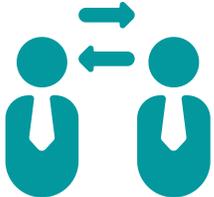

Because DeserveIT provides best-in-class ITaaS and security services, they wanted an expert security partner with the fastest threat detection and most thorough finding capabilities. Rob Levy, Chief Technology officer at Deserve IT, said, "When providing best-in-class cloud services, as we do here at DeserveIT, cybersecurity cannot be treated as an optional extra. ITaaS and mainly security is at the heart of what we offer our clients, who are some of the biggest names in the business community. Of course, the challenge

that we face is how to respond to a global threat landscape that is not only growing, but becoming increasingly complex, more cunning and more unpredictable. We turned to Security On-Demand to be the core of our security team in order to deliver premium security services to our clients."

"We turned to Security On-Demand to be the core of our security team in order to deliver premium security services to our clients." Roy Levy Chief Technology Officer, DeserveIT

SECURITY ON-DEMAND Security On-Demand (SOD) provides 24x7 advanced cyber-threat detection services for businesses and government agencies. Headquartered in San Diego, California, with R&D offices in Warsaw, Poland, SOD services and protects hundreds of brands globally, and is the winner of multiple industry awards.
