

## Managed IDS/IPS Service

Many organizations struggle to block threats on the network without interrupting business. Security On-Demand's™ Managed IDS/IPS Service helps solve this by delivering extremely fast, low latency managed IDS/IPS that provides the 24x7 support, monitoring, administration, maintenance, and reporting across IDS/IPS to help you identify attacks quickly.

### Service Features

Our Intrusion Prevention System (IPS) service is unrivaled in security performance, high availability, and speed to deployment time. By strategically placing our IPS device at powerful enforcement points, we can centrally control and enforce business-wide security policies, while having visibility to all network traffic and protecting against external and internal attacks. Security On-Demand's Managed IDS/IPS Service delivers:

- 24x7 or 8x5 Technical Support
- Emergency spares coordination and warranty replacement
- Maintenance updates and patches
- Standard reporting
- Security event log analysis
- Event correlation

### Efficient Security

- 24x7 technical support provided by certified security engineers.
- Our IPS solution ships as a turn-key appliance enabling ease of set-up with minimal administration and tuning.

### Reduced Risk

- Zero-Day threat protection with automatic updates of new filters combined with anomaly detection and vulnerability-based filters.
- Traffic shaping provides attack isolation and network discovery of vulnerable devices.

### High Performance

- Speed ensures business continuity. Our IDS/IPS solution has the lowest latency, highest connections per second and most stable hardware architecture available.
