

Managed Firewall Service

Security On-Demand's™ Managed Firewall Service delivers the 24x7 support, monitoring, administration, maintenance, and reporting across firewalls that you need to effectively maintain and manage the security posture of your organization.

Service Features

Many organizations today do not have the internal resources, expertise or time required to manage, maintain, and monitor their firewalls and other security infrastructure. As part of our service offering, we provide:

- 24x7 or 8x5 Technical Support
- Emergency spares coordination and warranty replacement
- Cloud-based hosted management server
- Maintenance updates and patches
- Firewall VPN monitoring
- IPS firewall management
- Standard firewall reporting
- Security event log analysis
- Event correlation
- Full UTM firewall blade feature support

Efficient Security

- 24x7 technical support provided by certified security engineers
- Focus on your business while we take care of maintenance and management tasks

Compliance

- Transparency and visibility into security events on the firewall
- Customized reporting designed to address regulatory requirements

Cost Effective

- Lowers your management and maintenance costs. This includes bundling hardware and software, hosting the management server or extending the lifespan of a product that you own.
