

# Managed Intrusion Detection/ Prevention (IDS/IPS)

FREE UP YOUR IT STAFF & SECURITY TEAM BY OFFLOADING ADMINISTRATION,  
MANAGEMENT & MONITORING TASKS

## Expert Maintenance and Management of your IDS/IPS System

Intrusion Detection and Intrusion Prevention (IDS/IPS) solutions are a critical component of network protection that every organization should be using. But, these systems require constant tuning, management, and specialized knowledge in order to remain effective. Many organizations today don't have the resources to stay vigilant against attacks.

## Don't Find Out After It's Too Late that Your IDS/IPS is Not Working

IDS and IPS systems require constant care and feeding. Signatures and digital vaccines must be continually updated and the devices need to be constantly monitored for threats and attacks. If legitimate traffic is blocked, immediate troubleshooting and escalation is also required.

## Service Overview

Security On-Demand helps organizations manage and maintain their IDS or IPS Systems to keep them performing reliably and optimally.

Alerts & Reports via Secure Client Portal

Continual updates of signatures & vaccines

Tune and manage all hardware with routine  
maintenance

Advanced Analysis of behavior and patterns using  
machine learning analysis (ThreatWatch)

24x7 Monitoring - SOC Security Operations Center

## Managed IDS/IPS Benefits

- Expertise - 24x7 technical support provided by certified staff and security engineers
- Flexibility - Use your own 3rd Party hardware or go with a 100% turnkey solution (physical or virtual) enabling ease of deployment
- Alerting - SOD will provide and manage all alerts both system and security related. Event severity mapping into our ThreatWatch Analytics platform will reduce false positives.
- Response - Traffic shaping provides attack isolation and network discovery of vulnerable devices (based on device)
- Cost - We can provide support and management at a fraction of the cost of full time staff.
- Co-Management - We can offer a shared responsibility model by allowing co-management of the device. This can improve troubleshooting with awareness of enforcement policies.

Managed IDS/IPS can also be made cost effective by bundling together with other SOD services such as ThreatWatch MDR.
